

Antenna Tracking Pedestal

ATS-AE**KEY FEATURES**

- dual axis Azimuth & Elevation pedestal construction
- WINS ultra fast mounting system
- rugged and weatherproof design
- brushless motor and planetary gear drive mechanism
- better than 0.4° accuracy digital encoders

**DESCRIPTION**

The heavy duty fast mounting system allows ultra fast installation of the parabolic antenna ATS-B. The use of other antennas with standard mounting system is possible.

The ATS-AE pedestal system is a lightweight, self-contained elevation-over-azimuth tracking solution for the WINS radio network system. This portable ground-based pedestal is ideal for radio applications such as UAV control and data link, aircraft flight test and telemetry.
